## Applied Statistical Analysis

EDUC 6050 Week 14

Finding clarity using data

## TOCAY

# Categorical Outcomes

#### Research Portfolio

Get into small-ish groups

Answer the following questions:

What were the most common methods that you found in your studies?

Were statistics commonly used or hard to find in your field?

Why do you think that is?

Did you find any that seemed to not use the method correctly?

In what ways did they make any mistakes?

Were the authors transparent about their approach (i.e., discussed it in sufficient detail)?

Did they post their data and/or analyses online somewhere?

Was this assignment helpful?

Why or why not?
